

Ts Menu V 5.2 Final

2008-01-28 23:27:59 by queen_live78

New version of Ts Menu V 5.2 created by queen_live78. The Ts Menu V5.2 is a module for Php Nuke 7.6 that allows to directly create from the panel administration a menu for your portal; This does not have anything to do with menu already existing which "Sommaire" or "PhpBB2". The Ts menu V5 allows the total modification of the menu taking advantage of characteristic following: Through a form of insertion you will be able to insert the title of the link of the menu, the link of destination, to choose the destination of opening of the window, the type of character, the dimension, the style, the color, the background, to apply effects of rollover, to choose a static icon and of rollover without having to make the upload of the rows in accordance to moment, but simply taking advantage of a function of insertion through the key it leaf through from the form same, to choose the dimension of the icon, to select all the types of colors taking advantage of one palette compatible with all the browser existing completely integrated, to apply the edges to the menu, to choose of the dimension, the style (between different styles), to choose the thickness and side the every color single of the edge, moreover the possibility is had to include statistics more regarding important the situated one on which it will come installed. In this version beyond the graphical improvement is added the possibility to move the link to pleasure, as well as for the blocks from the panel administration of the Nuke. Through a preview panel all can be verified in real time the modifications brought to the menu. This version has been head on wl-nuke 1.0 (version of weblord) and on version 7.6. The operation on other versions is not guaranteed, even if us they would not have to be particular problems of incompatibility.
